

MTC 24 Series

TIRE CHANGER

MESSMATIC®

TIRE CHANGER

MTC 24 Series

Power. Speed. Control. In One Machine.

Engineered to maximize your workshop efficiency, this next-generation tire changer delivers high performance under demanding conditions.

With its wide rim clamping range, it ensures seamless operation for both passenger and light commercial vehicle wheels. The robust structure combined with a high-torque motor guarantees reliable mounting and demounting even on the toughest tires.

The dual-speed rotation system gives operators full control while reducing operation time. The result: faster service, higher throughput, increased profitability.

Its compact footprint allows you to optimize your workspace without compromising productivity.
